## **Integrative medicine treats you, not your disease**

In America we don't have a health care system – we have a sick care system.

## **Integrative medicine is true health care.**

*Answer this simple question:* Would you rather spend money on medication that provides temporary relief or money on your body, mind and spirit that provides lifelong health?

Integrative Medicine is an incredible blend of healing modalities from around the world. The power of this holistic practice extends from simple changes that bring amazing results.

I am an Integrative Medicine Healer and Licensed Nurse Practitioner with over 25 years experience in treating you and your body far beyond symptoms, illness or disease. My specialty training includes being one of only 1000 practitioner's worldwide as a graduate of the Integrative Medicine Fellowship through University of Arizona's program with Dr. Andrew Weil.
